Construction Details

- The replacement of the watermain will involve the installation of temporary water services; the installation of new pipes; disinfecting and flushing of the new pipes; transferring water service connections from the old to the new watermain; replacement of substandard water services on City property; and restoring areas disturbed during construction. Temporary disruptions to the water supply will occur during the construction period. Further notice will be given prior to any

scheduled water supply disruption and residents and businesses will be informed if additional precautions are to be taken during the water supply disruptions.

- During construction, noise and vibration should be expected during working hours. All efforts will be made to minimize this and other disruptions to the local community.

- Emergency (police, fire and medical response) access will be maintained at all times.
- Recycling and garbage collection will not be affected. Please follow your normal routine.
- On-street parking may be restricted during the daytime. Affected residents may park on adjacent streets. Residents are advised not to park where on-street parking is prohibited. There will be no consideration for parking offences in areas designated as No Stopping, No Standing, Stopping on Sidewalks or Boulevards, by Fire Hydrants, Fire Routes, Rush Hour Routes and parking within 9 metres of intersections.

Important Advisories

- Residents and businesses are advised that they may have to remove any unique landscaping and/or lawn sprinkler systems that are located on the City portion of their property before work begins, as well as delay any improvements to driveways until construction is completed. If you have a lawn sprinkler system on the City portion of your property, please contact R.V. Anderson Associates Limited (see below for contact information) to arrange for a site inspection. If your landscaping requires removal, then R.V. Anderson Associates Limited will advise you of that.
