

Live Green Toronto is a new, city-wide program to help communities launch neighbourhood climate change and clean air projects.

Community Animators have been hired to work with you on the green projects your community wants. Our task is to inspire residents of Toronto to Live Green! We want to work with tenants, home-owners, community-based groups, and not-for-profit organizations on environmental initiatives that they are interested in, or help find green opportunities in your neighbourhood.

We will connect you and your community with resources through:

- free public workshops
- printed or online information (“toolkit”) in English and other languages
- assistance in determining and refining project ideas
- connecting you with expert advice, as well as service and material providers
- guidance for your volunteers
- assistance in determining funding opportunities for your project(s)

We want to work with you to identify a local Live Green vision, and bring it to life through a community project. Let’s ‘green’ Toronto – together!

**See over for upcoming events hosted by your animators,
and visit our website www.livegreentoronto.ca for more information.**
