

North Queen Street Major Road Rehabilitation Including Sanitary Sewer

East of The East Mall to Vansco Road

Expected Contract Start Date:

May 2010

Expected Contract Completion Date:

August 2010

As part of the 2010 Capital Works program, the Etobicoke York District of Technical Services for The City of Toronto has scheduled the rehabilitation of North Queen Street from east of The East Mall to Vansco Road. As part of this work new sanitary sewer will be built and existing sanitary services upgraded. New sidewalk and bus shelters will be built on the south side of North Queen Street.

Design Details

North Queen Street will be rehabilitated including removal (grinding) of existing asphalt pavement, followed by concrete road base repair, catchbasin repair, curb replacement where required, sidewalk replacement where required, driveway repair, boulevard improvements and new asphalt road pavement. Prior to this roadwork taking place, new sanitary sewer pipe and manholes will be built and existing sanitary services replaced from the sewer to the front property line. The existing width of North Queen Street will not change. Two lanes of vehicular traffic in each direction will remain. Drainage and alignment improvements will be made as necessary where side streets intersect with North Queen Street.

In order to complete the sanitary sewer and road rehabilitation work in a safe manner, it will be necessary to reduce traffic lanes. Access to driveways will be interrupted from time to time during construction. The contractor is obligated to notify businesses of any temporary driveway closures. We ask that businesses inform the City engineer regarding critical delivery schedules so that these can be co-ordinated with the Contractor's work.

Next Steps

The project is currently in the detailed design stage. Drawings for the project will be posted on the City's Public Consultation website when ready. The drawings can be viewed at <http://www.toronto.ca/improvements/> once they are posted in March 2010.
